

ASTROZOOM

A VIEW FROM OUT OF THIS WORLD

A POWERFUL NEW FEATURE FOR YOUR VIRTUAL TOURS

Looking for a way to WOW visitors and customers with your Decora Photography virtual tours? The latest and greatest feature found in the Decora Photography Fusion virtual tour system is designed to grab attention by offering viewers something they've never seen before. An outer space fly-in! Check it out online at: <http://tours.bluelavamedia.com/72453>

AstroZoom lets you zoom in from outer space, directly to your property or business. We'll create a powerful, visually stunning video that starts with a view of Earth from space, and then slowly zeroes in on your listing or business.

This powerful technology creates the visual experience of flying to your property. The planet image rotates to center your geographic location, and then the video zooms down toward the surface and through the atmosphere. The closer the view, the more detailed the landscape, until the camera finally focuses on your listing or business. See more examples of our new AstroZoom technology in our virtual tour gallery at our web site bluelavamedia.com

Draw your viewers in – literally!

Adding AstroZoom to your Decora Photography Fusion virtual tour is a dramatic and exciting way to spark interest among your visitors. For only \$25.00 (Real Estate Tour Cost), we will create a crisp and visually enticing, high-quality AstroZoom video with your exact address, for use in your Fusion interactive virtual media presentations, online advertising, and more.

Call us today to get started with AstroZoom, and turn your virtual tour into an irresistible magnet for buyers and of course an even more powerful listing tool!
