

Maximum Exposure - More Showings -

Our virtual tours are visually stunning – mobile ready – interactive – and **MASS DISTRIBUTED**. This is our specialty!

The *RTV Exposure Engine* sends your listings to the most popular real estate portals such as: Trulia, FrontDoor, Oodle, Hot Pads, Vast, Homes.com, Craigslist, HomeSeekers.com, OLX, YouTube, BackPage, Reachoo, TourGrandTraverse.com, Geebo, Trovit, and more. 98% of all RTV virtual tours receive our Exposure Engine because IT WORKS!

These tours receive an average of 50% more viewings!

It's a proven fact that today's home shopper digs for more information on specific properties than ever before using search engines. Good news! Using our SpiderLink Technology, we make sure your listings rank high in the search engines on your property address. In many cases, those searching for you by name will also see your properties in the search results as well.

SpiderLinks Work! – Search for yourself!

Our weekly virtual tour traffic reports break down hits by day, month, quarter, and year. See the number of times your listings have been emailed, downloaded, shared, liked, scanned by a smart phone, sent to friends and so much more. You'll love reviewing this each week as we actively help you market your listings.

**You will know for sure
with Traffic Reports!**

Using your Agent Toolbox you can even login to your Fusion control panel and have your weekly reports sent directly to your home sellers FROM YOU!
